## Calculul volumului pentru un arboret echien de gorun prin metoda seriilor de volume relative

 $(d_g = 35,53 \text{ cm}, d_g = 35,6 \text{ cm}, h_g = 24,9 \text{ m})$ 

| Categoria<br>de diametre<br>(cm) | Numărul de<br>arbori | Volume<br>relative | Volumul<br>arborelui<br>mediu<br>(m³) | Volume<br>unitare<br>(m³) | Volumul pe<br>categorii de<br>diametre<br>(m³) |
|----------------------------------|----------------------|--------------------|---------------------------------------|---------------------------|--|
